SUMMARY

Computer Science Engineering student specializing in AI & ML with experience in Python, Machine Learning, and Full-Stack Development. Actively leverage AI-assisted development tools to accelerate coding, debugging, and software design while maintaining strong problem-solving and programming fundamentals.

TECHNICAL SKILLS

Programming: Python, JavaScript, C

Web Development: HTML, CSS, Tailwind CSS, React.js, Node.js, FastAPI, Express.js, Flask

Databases & Cloud: MongoDB, PostgreSQL, MySQL, Firebase, Vercel, Render

Libraries: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, TensorFlow, PyTorch

AI & Machine Learning: Machine Learning Pipeline, Deep Learning, Neural Networks, Natural Language Processing (NLP), Generative AI, LLMs, Prompt Engineering, RAG, AI Agents, Agentic AI, Embeddings, Vector Databases, LangChain, LangGraph, Multi-Modal AI

Tools: Git/GitHub, VS Code, Jupyter Notebook, AWS, PowerBI, Docker, Ollama, Hugging Face, Redis

Core Concepts: Data Structures & Algorithms, DBMS

PROJECTS

EduPath – ACPC College Predictor | React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT [\[Link\]](#)

- Developed a full-stack web application to predict college admission chances based on ACPC rank using historical cutoff data..
- Built a rank prediction engine using historical cutoff data for accurate insights.
- Built RESTful APIs, secure JWT authentication, and optimized MongoDB schemas for colleges, institutes, and users.
- Designed a responsive UI with filtering options for category, branch, institute type, and year; deployed on Firebase and Render.

CampusBot – AI-Powered College Assistant | Python, Flask, PostgreSQL, JavaScript, Groq API [\[Link\]](#)

- Developed a full-stack college management platform featuring role-based UIs for students, faculty, and admins.
- Built a conversational AI chatbot using Groq's Llama-3.3 LLM to provide instant, 24/7 answers to campus-related queries.
- Designed and implemented RESTful APIs with Flask and created optimized PostgreSQL schemas using SQLAlchemy.
- Created an automated real-time notification system for academic updates, assignments, and placement drives.
- Simplified campus operations by centralizing attendance tracking, timetables, and support tickets into a unified portal.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science Engineering (AI & ML)

Adani University, Ahmedabad, Gujarat

July 2023 – August 2027

Current 6th Semester

CGPA: 7.1 / 10

ADDITIONAL INFORMATION

Languages: English, Hindi, Gujarati

Certifications: [Full stack generative and Agentic AI with python,](#)
[AWS Machine Learning Essentials,](#)
[AWS Cloud Foundations,](#)
[AWS Cloud Architecting](#)

Awards/Activities: Built IoT-based firefighting robot hardware project using sensors and embedded systems
